

Cynthia,

I wanted to take the time to let your company know how they have affected my business.

As a small business owner reputation and reliability is something you have to earn. It's not easy and for us it takes a collaborative effort from our subcontractors. At times it is frustrating as there are many moving parts in our project and I rely on my subcontractors for their expertise and service to help me build my company. Finding good help is very difficult. Electricity is not something we take chances on so a great electrical contractor is crucial to what we do almost daily.

We are fortunate to have had the pleasure of working with JJ and the Good Energy Solutions team on many projects. Their excellence in quality, scheduling, flexibility, and customer service has provided a one-stop-shop solution for our company and our customers. JJ makes us look good and we never get calls to come back. To top it all off, he's one heck of a nice guy! We call him for all of our service, and new electrical installation needs and will continue to do so in the future.

If anyone has a small request, strange question, complex install, electrical repair, or new project, I recommend calling him at Good Energy Solutions, they won't regret it!

Thank you for all your help

Mike Warner and the Construction Specialties crew.
