Good Energy Solutions Selected to Work on Westar's Community Solar Site

LAWRENCE, KS, May 22, 2017 – Good Energy Solutions, a Lawrence-based solar installer, was selected to contribute to the installation of Westar Energy's Community Solar Site. The 1.27 megawatt solar site is located near South Hutchinson, KS and consists of nearly 4,000 solar panels.

"We are pleased that Westar continues to diversify its energy production portfolio by investing in renewable energy projects that include solar and wind instead of fossil fuels," said Kevin Good, President of Good Energy Solutions. Good added, "We feel that solar is the inevitable future of electricity generation, so the sooner the transition takes place, the sooner the 19th and 20th century fossil fuel models of electricity generation can be retired for the health and wellbeing of our children and their children."

SoCore Energy out of Chicago, Illinois is the project developer, and Brandt Companies of Austin, Texas was hired to oversee the project and selected Good Energy Solutions to complete the electrical work for the solar portion of the project, which included 17 inverters. The array is scheduled to be complete in May.

About Good Energy Solutions, Inc.

Good Energy Solutions, Inc. is a full service energy partner that is able to provide comprehensive consulting and services in electrical, renewable energy, energy efficiency and energy management in the central US region. Founded in 2007, Good Energy Solutions has earned a reputation of reliable service, expertise, and quality through commercial and residential installations of Solar and Energy Efficiency Equipment. Good Energy Solutions is "Energy with Integrity" and a SunPower Authorized Dealer. For more information, visit <https://www.goodenergysolutions.com/>
