Good Energy Solutions Teams Up to Make Solar Power Educational Carts for Olathe West High School

LAWRENCE, KS May 10, 2018 – Good Energy Solutions, Inc, a Lawrence-based solar installer, has completed working with Olathe West High school students in the Green Tech Academy on their new solar educational carts. Installation Technician, Randy Heck, worked with students during the installation to educate them on installation as well as train them on monitoring solar production using their existing PV solar trainers.

Educating others on solar and solar technology has always been a big part of the philosophy of Good Energy Solutions. And we are happy to contribute to the knowledge of today's youth. "We hope these serve the school well for many years to come," said Matt Bellemere of Good Energy Solutions.

Good Energy Solutions teamed up with Seibel Fabrication of Lawrence KS, who designed and built the metal carts. The design ensures that the carts easily roll outside as well as adjust angles for solar production and storage. The educational carts were made possible by a grant from Westar.

About Good Energy Solutions, Inc.

Good Energy Solutions, Inc. is a full service energy partner that is able to provide comprehensive consulting and services in electrical, renewable energy, energy efficiency and energy management in the central US region. Founded in 2007, Good Energy Solutions has earned a reputation of reliable service, expertise, and quality through commercial and residential installations of Solar and Energy Efficiency Equipment.
