Good Energy Solutions, Inc. Named a SunPower Elite Dealer

Experience and Service Differentiate Best-in-Class SunPower Dealer Network

LAWRENCE, KS January 3, 2018 – Good Energy Solutions, Inc., a Lawrence-based solar installation company, has been elevated to “SunPower Elite Dealer” status by SunPower Corp. (NASDAQ: SPWR), a leading solar technology and global energy services provider based in Silicon Valley, CA.

Within the network of more than 1,800 solar companies worldwide that sell, install and service SunPower products, Elite Dealers earn their status by achieving a 90 percent or greater customer satisfaction score on past installations and successfully completing two advanced certification courses. Course topics include installation and design of high efficiency SunPower systems. Good Energy Solutions has demonstrated its dedication to customer service with positive customer satisfaction results and the completion of post-installation site inspections.

“We tell our customers that not all solar is created equal, and make sure they know that SunPower products are the most efficient and reliable solar solutions on the market today. Elite status validates our commitment to the homeowners of Kansas, Missouri, and the Central US Region, as well as our commitment to the SunPower Brand,” says Kevin Good, President of Good Energy Solutions. “The high quality SunPower technology combined with Good Energy Solution’s reputation for excellent craftsmanship and customer service convinced the owner of Copper’s Carts, located in Hays, KS, to select Good Energy Solutions to install a 12.54kW SunPower system on the roof of Copper’s Carts last fall. As a result, Copper’s Carts is expected to save about \$3,400 on its electricity bills over the next 12 months, with an expected lifetime savings of over \$130,000.”

About Good Energy Solutions, Inc.
