Good Energy Solutions Named a SunPower Commercial Dealer

Experience and Service Differentiate Best-in-Class SunPower Dealer Network

LAWRENCE, KS, March 21, 2017 – Good Energy Solutions, a Lawrence-based solar installer, has been selected as a SunPower Commercial Dealer, joining a network of more than 1,800 solar companies worldwide that sell, install and service SunPower products.

SunPower commercial dealers handle every step of the solar process for customers including system design, installation, and maintenance, as well as financing approach, permitting, and rebate processing. SunPower carefully selects dealers based on exceptional customer service, premier system design and installation practices for small to medium-sized businesses, and expert solar knowledge and leadership. SunPower dealers also complete regular, in-depth training on SunPower products and services ensuring SunPower systems provide lasting value to customers.

“We tell our customers that not all solar is created equally, and make sure they know that SunPower products are the most efficient and reliable solar solutions on the market today,” said Kevin Good, president of Good Energy Solutions. “The high quality SunPower technology combined with Good Energy Solutions’ reputation for excellent craftsmanship and customer service convinced United Wireless of Dodge City, KS to select us to install two 35kW SunPower systems on the roofs of their buildings in early 2017. In addition, we retrofitted 1,359 fluorescent lights with LEDs. Between the 214 solar panels and the LEDs, this forward thinking company will save about \$30,000 per year on operating costs and offset the equivalent energy of over 40 tons of coal annually.”

About Good Energy Solutions, Inc.
