

Introducing the NEURIO Home Energy Monitor

The Smarter Way to Manage Your Home Energy Costs

Let Good Energy Solutions install a Neuroio Sensor in your electrical panel so you can get started monitoring your energy use painlessly.

Real Time Energy Monitoring

The Neuroio Sensor monitors your home energy use in real time so you can see what's on by using either the smartphone app or the website.

Bill Forecasting

Allows you to see what your projected bill will be, before it arrives. You can also set your budget and be alerted when you are trending over it.

"Always On" Score

Helps you reduce your Always On or Phantom power which is one of the highest monthly costs. And, allows you to see your consumption history over the day, week, month or year.

Energy Saving Tips

Gives you some tips on areas Neuroio thinks you can reduce your energy use.

Monitor Your Solar System

By monitoring both generation and consumption, you can see what your net consumption is and how much money your solar investment is saving you.

Give us a call to get started learning how you can use less energy in your home and leave more dollars in your wallet.
