

FOR IMMEDIATE RELEASE

Good Energy Solutions of Lawrence, Kansas Featured on 2019 Top Solar Contractors and Top 100 Commercial Contractors Lists

The Solar Power World Top Solar Contractors list includes Lawrence, KS based solar firm

Lawrence, KS, July 24, 2019— With renewable energy expected to be the fastest growing source of U.S. electricity generation for at least the next two years, local solar installer Good Energy Solutions is happy to be contributing to the country's energy mix. Good Energy Solutions has been recognized by *Solar Power World* (<https://www.solarpowerworldonline.com/>) magazine for its installation efforts, achieving a rank of 264 out of 415 solar companies on the magazine's [2019 Top Solar Contractors list](https://www.solarpowerworldonline.com/top-solar-contractors/) (<https://www.solarpowerworldonline.com/top-solar-contractors/>), and a rank of 88 on the Top 100 Commercial Contractors List.

The Top Solar Contractors list is developed by *Solar Power World* to recognize the work completed by solar contractors across the United States. Produced annually, the Top Solar Contractors list celebrates the achievements of U.S. solar developers, subcontractors and installers within the utility, commercial and residential markets, and ranks contractors by kilowatts installed in the previous year.

"*Solar Power World* enjoys assembling the Top Solar Contractors list each year, and our 2019 edition features hundreds of companies making big impacts in local energy markets," said Kelly Pickerel, editor in chief of *Solar Power World*. "Solar power is becoming competitive with traditional electricity sources in more markets, and cities and states are demanding more renewable energy options. It's a great time to be a solar installer, and we're happy to highlight the best installation companies in the country on our list."

The U.S. solar market is expected to see 14% growth in 2019, with over 12 GW of new solar power added to the grid this year — enough to power 2.28 million average American homes. This increase in installations is attributed to strong residential solar interest and a rush to get projects in before the 30% federal investment tax credit steps down to 26% next year.

The emerging energy storage market will also influence solar installations going forward. In markets that encourage grid service applications like time-of-use (TOU) shifting, self-consumption and backup power, battery systems paired with solar arrays are attractive options for home and business owners looking to save costs.

"We'd like to thank Solar Power World for their continued recognition of the hardworking companies on the front lines of the solar energy revolution. It's an honor to be listed among the leaders in our industry," said President of Good Energy Solutions, Kevin Good. "As the financial value proposition of solar versus fossil fuels improves, we are already seeing dramatic growth in 2019. The future is bright, indeed!"

Good Energy Solutions employs 30 workers who installed 1,452.5kW of solar power in 2018. Since its founding in 2007, the company has installed 5,009kW of solar. Good Energy Solutions, Inc. is a full service energy partner that is able to provide comprehensive consulting and services in electrical, renewable energy, energy efficiency and energy management in the central US region. Founded in 2007, Good Energy Solutions has earned a reputation of reliable service, expertise, and quality through commercial and residential installations of solar energy systems, energy storage, and efficiency retrofits. Good Energy Solutions is "Energy with Integrity" and a SunPower Elite and Commercial Dealer. For more information, visit <https://www.goodenergysolutions.com/>
